MAI ABO-ELDAHAB

Full-Stack Web Developer (Node.js / React) | Cloud & DevOps Enthusiast

Cairo, Egypt | 01128004712 | maikhaled.aboeldahab@gmail.com

linkedin.com/in/mai-aboeldahab2092000 | https://my-portfolio-sigma-swart-66.vercel.app/

PROFESSIONAL SUMMARY

Space Technology graduate with a background in embedded systems and about one year of focused, production experience in full-stack development (Node.js, React, MongoDB), building RESTful APIs, JWT-based authentication, and role-based access control. With active study of infrastructure automation and monitoring, brings roughly six years of broader technical experience spanning Python, C/C++, and embedded systems, plus a prior background as a robotics instructor, translating into fast ramp-up on new tooling and comfort working across the full stack.

TECHNICAL SKILLS

- **Backend:** Node.js, Express.js, Asynchronous Programming, RESTful API Design, JWT Authentication & Authorization, Secure API Integration, ASP.NET, Laravel
- **Frontend:** React.js, Next.js, Component-Based Architecture, Responsive & Accessible UI, HTML5, CSS3, Bootstrap, Angular
- **Databases:** MongoDB, SQL, CRUD Operations, Schema Design & Query Optimization
- **Cloud & DevOps:** AWS (Cloud Practitioner certified), Docker, Kubernetes, CI/CD Concepts, Linux Server Management (Ubuntu, AWS Linux), Infrastructure-as-Code (learning Terraform), Monitoring & Observability (Prometheus, Grafana)
- **Practices:** Git/GitHub, Agile, OOP, Clean Code, Secure Software Design, Threat Modeling, Vulnerability Assessment
- **Languages:** JavaScript (ES6+), Python, C++, C, SQL

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern — Ministry of Communications & Information Technology (MCIT) , Digilians

Dec 6, 2025 – Present

Military Academy, Cairo Egypt

- Built and maintained full-stack web applications with Node.js, Express.js, and React.js, developing RESTful APIs for secure frontend-backend communication.
- Implemented JWT-based authentication and role-based access control, applying secure coding practices across the stack.
- Designed and managed MongoDB and SQL database schemas, performing CRUD operations and optimizing queries for reliability.
- Deployed applications to AWS, gaining hands-on exposure to cloud-based application architecture and Linux-based server environments.
- Explored DevOps workflows including CI/CD concepts, containerization, and automation.

Robotics Instructor - Pyramakerz (Jan 2024 - Jun 2025)

- Taught robotics and foundational programming concepts, building on an embedded systems and space technology background prior to specializing in software development.

RELEVANT PROJECTS

Heal Mind — AI-Powered Mental Health Platform *Aug 29, 2026*

React.js, Node.js, Express.js, MongoDB | https://github.com/maikhaledaboeldahab/Healmind.git

- Built a full-stack platform connecting patients and doctors, with secure authentication and role-based access for patients, doctors, and admins.
- Designed RESTful APIs and MongoDB schemas to support consultations, community features, and an AI assistant integration.
- Built responsive, accessible UI components focused on performance and usability.

A-Space — Research-to-Implementation Platform *Aug 2026*

React.js, Node.js, Express.js, MongoDB | https://github.com/maikhaledaboeldahab/Aspace.git

- Built a platform that structures and serves research-derived project data through RESTful APIs and a designed database architecture.

E-Commerce Platform — Full-Stack MERN Application *Sep 2026*

MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Built a full-stack e-commerce web application implementing product catalog browsing, shopping cart, and order management with a RESTful API backend.
- Designed MongoDB schemas for products, users, and orders, and implemented secure user authentication and authorization to support customer and admin roles.

Linear Equation Parser *Feb 2025*

C | https://github.com/maikhaledaboeldahab/parsing-Linear-equations-c-

- Built a C program to parse and solve systems of linear equations, reflecting early foundations in low-level programming and embedded/systems-level thinking.

CERTIFICATIONS

- AWS Cloud Practitioner – 22 Jul,2026
- Front End Development Specialization — Coursera – 30 May,2026

EDUCATION

B.Sc. in Navigation and Space Technology — Beni-Suef University, Beni Suef, Egypt

Oct 2018 – July 2023

- GPA: 3.1 | B+ | Strong foundation in engineering, mathematics, and systems design
- Graduation Project: Designed and built an ion thruster system using debris particles for ion propulsion — an engineering-heavy, systems-level project requiring cross-domain technical problem solving.

Professional Diploma in AI-Powered Software development (Digilians presidential initiative) with Ministry of Communications & Information Technology (MCIT) and Egyptian Military Academy , Cairo, Egypt

Dec 2025 – Sep 2026

CONTINUOUS LEARNING (IN PROGRESS)

- Cloud, DevOps & Infrastructure: CI/CD pipelines, GitHub Actions, Jenkins, AWS Cloud Services, Docker, Kubernetes, Terraform (IaC), Monitoring & Observability, Cloud Security, Microservices Architecture, Load Balancing.
- Advanced Software Development & Security: Secure Software Design, Event-Driven & Microservices Architecture, Vulnerability Assessment, Threat Modeling, Penetration Testing, Security Auditing.
- Agentic AI: n8n automation platform.

SOFT SKILLS & LANGUAGES

- Problem Solving, Analytical Thinking, Team Collaboration, Adaptability, Project Coordination, Technical Documentation, Continuous Learning.
- Excellent oral and written English communication skills; German (beginner).
