MAI ABO-ELDAHAB

Full Stack Developer & Junior DevOps Engineer

AWS Cloud | CI/CD | Docker | Kubernetes | Automation Enthusiast

Cairo, Zahraa Nasr City | 01128004712 | maikhaled.aboeldahab@gmail.com | https://www.linkedin.com/in/mai-aboeldahab2092000

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building scalable web applications using Node.js, Express.js, React.js, MongoDB, and SQL. Skilled in designing RESTful APIs, implementing JWT-based authentication and role-based access control, and working across the full development lifecycle from database schema design to responsive UI implementation. Currently building projects spanning AI-assisted mental health platforms and space-technology research tools, while developing foundational skills in AWS, Docker, Kubernetes, and CI/CD to support cloud-ready application delivery.

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, Bootstrap, Responsive Web Design, Component-Based Architecture

Backend: Node.js, Express.js, RESTful APIs, Authentication & Authorization (JWT), API Integration

Databases: MongoDB, SQL, Schema Design & CRUD Operations

Programming Languages: JavaScript (ES6+), C++, C, SQL

Version Control & Methodologies: Git, GitHub, Agile, OOP, Clean Code Principles

Cloud & DevOps (Foundational): AWS, CI/CD Concepts, Docker, Kubernetes, Linux Fundamentals, Monitoring & Observability (Prometheus and Grafana)

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern *Ministry of Communications & Information Technology (MCIT), Digilians*

Cairo, Egypt | December 2025 – Present

- Developed and maintained full-stack web applications using Node.js, Express.js, React.js, JavaScript, HTML5, and CSS3.
- Designed and implemented RESTful APIs to enable secure communication between frontend and backend systems.
- Built authentication and authorization mechanisms using JWT and role-based access control.
- Worked with MongoDB and SQL databases, performing CRUD operations and schema design.
- Collaborated using Git and Agile methodologies to deliver project requirements and improve code quality.
- Participated in debugging, testing, and refactoring code to improve scalability and maintainability.
- Gained hands-on experience deploying applications on AWS and understanding cloud-based application architectures.
- Explored DevOps practices including CI/CD concepts, containerization, and automation workflows.

PROJECTS

Heal Mind — AI-Powered Mental Health Platform (Completed)

Technologies: React.js, Node.js, Express.js, MongoDB, RAG (Retrieval-Augmented Generation), JavaScript

- Built a mental health platform connecting patients with certified doctors for consultations and support.
- Integrated an AI assistant using RAG to provide contextual, knowledge-grounded mental health guidance.
- Designed a community feature allowing patients to connect with and support one another.
- Implemented secure user authentication and role-based access for patients, doctors, and admins.
- Built responsive, accessible UI components focused on a calm, user-friendly patient experience.

A-Space — Research-to-Implementation Platform (In Progress)

Technologies: React.js, Node.js, Express.js, MongoDB, JavaScript

- Building a platform that converts space-field scientific research into actionable implementation plans.
- Designing tools that surface the data and space technologies needed to turn research into real projects.
- Developing RESTful APIs and a database architecture to structure and serve research-derived project data.
- Applying software engineering principles and clean architecture across the full development lifecycle.

Linear Equation Solver

Technologies: C++

- Built a C++ application capable of solving systems of up to 100 linear equations.
- Applied data structures, algorithms, and problem-solving techniques.

CERTIFICATIONS

- AWS Cloud Practitioner
- AWS Developer
- Front End Development Specialization — Coursera

EDUCATION

Bachelor of Navigation and Space Technology

Beni-Suef University, Beni Suef, Egypt | Graduated: July 2023 | GPA: 3.1

Graduation Project: Designed and built an ion thruster system using debris particles for ion propulsion.

LEARNING & TRAINING

DevOps, Cloud Computing & AI-Driven Automation (In Progress)

DevOps Principles, CI/CD Pipelines, GitHub Actions, Jenkins, AWS Cloud Services, Docker, Kubernetes, Terraform (IaC), Monitoring & Observability, Cloud Security, Microservices Architecture, Load Balancing, Cloud Cost Optimization.

Agentic AI

n8n automation platform.

Advanced Software Development & Security

Secure Software Design Principles, Microservices Architecture, Event-Driven Architecture, Software Security Fundamentals, Vulnerability Assessment, Risk Mitigation Strategies, Secure Coding Practices, Penetration Testing, Security Auditing, Threat Modeling, Compliance Requirements, AI-Powered Security Tools, Real-Time Monitoring, Threat Detection and Prevention.

SOFT SKILLS

Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability, Time Management, Project Coordination, Continuous Learning, Technical Documentation.

LANGUAGES

English — Intermediate | German — Beginner
